

# VUMI SAMPLE™ - Repository

**My Repository**

**What is this section?**

My Repository is the place where you store all of your artifacts (images, videos, audio files, documents and wallpapers). Some of these files will be displayed in your ePortfolio and others can be downloaded.

Please note: vumi does not store video files, but does support YouTube videos.

For more information on file types that can be added to My Repository, click the help icon at top right.
